

Partner Presentation on Video

Action involving Belarus, Ukraine, Moldova and Denmark

The ideal-ist management board has agreed on the following action, where Belarus, Ukraine, Moldova and Denmark are the involved countries.

We have promised to select up to 8 organisations, and develop a video presentation of each organisation, with the aim to promote the organisation for consortia developing application for EU funding.

Our goal is quite simple: Give the organisations a possibility for presenting themselves.

We have developed a template/guidelines for what the video should give answers to.

The template is a minimal guideline, and can be extended if needed, but the presentation should not be longer than 5 minutes.

A step by description of what we have to do it given here:

We have to select some organisations (select some with potential or some who have tried to get into a EU-proposal before).

We have to help them writing a script (the template is on page 2), my suggestion is to ask them filling out the template and then send it to you/me for review and comments.

Then they have to record it and send the video to us, probably they have to record it several times and hopefully the one we receive will be reasonable. Anyway we all have to help and reviewing the result before publishing.

We will provide a web site where all the presentations can be seen from the world. This web site will be promoted by the ideal-ist.net, just as we are informing all the members about how to use it.

When we have some presentation we will decide if we can/want to make an on-line presentation. I have money for renting a system from which we all can go online and make some presentations or recommendations for the web site with all the presentations. This we will test and practise during August and the beginning of September.
